

Workshop Description

EARLY CHILDHOOD EDUCATION

Educating Parents About Early Literacy Development

Getting parents involved in the reading process with their children is the focus of this workshop. You will learn tips to facilitate parental involvement in practical activities which enhance literacy. Provide encouragement and assistance to parents through a host of hands-on activities designed to galvanize literacy development. You will familiarize parents with literacy computer websites that focus on improving vocabulary and reading fluency.

New Perspectives on Young Children Learning to Read and Write

This course will focus on new and emerging research about emergent literacy on developing the of young children. Learn how to create a literacy enriched learning environment which accommodates a wide range of abilities and fosters the interest of young children. You will learn to assess and modify instruction to meet the needs of individual learners.

Promoting Literacy in Early Childhood Classroom Environments

How does the classroom's physical environment impact literacy? Discover how the physical environment in which teaching and learning occur are paramount to student success. Learn to create a physical arrangement that will allow children to practice, and share their developing literacy skills by incorporating them into their play themes, and structuring opportunities for free play which promotes cognitive and literacy development.
