

## Workshop Description

### **MATH LITERACY**

#### **Financial Literacy**

Discover how this Money Smart Program for youth, a financial education program, will help young people enhance their money management skills and create positive banking relationships. The goal of the Money Smart program is to improve mathematical computation and analytical skills, promote financial education, for low and moderate income communities. This program targets middle and high school students with little or no banking experience and/or those outside of the financial mainstream.
